Key message

If you are posting on social media, remember to tag us @breastscreenvictoria

Breast cancer develops in 1 in 7 people that were assigned female at birth. People that were assigned male at birth have a lower risk, but their risk increases when they are on Hormone Replacement Therapy (HRT) for 5 years or more.

A free, 10-minute breast/chest screen can detect cancer when it's still too small to feel, even by a doctor. The sooner cancer is found, the more successful treatment is likely to be.

Since March 2019, BreastScreen Victoria has been Rainbow Tick accredited. This drives ongoing improvement to build lasting LGBTIQA+ inclusion.

Are you aged 50 to 74?

If you have no breast symptoms, a breast/chest screen is recommended for:

- Cis women
- Trans women (5+ years on HRT)
- Trans men (that have not had top surgery)
- Gender diverse/non-binary people (AFAB and have not had top surgery or AMAB with 5+ years of HRT)

To find out more about eligibility, or to book a breast/chest screen, visit **breastscreen.org.au/rainbow** or call **13 20 50**.

Free breast/chest screening in a safe and inclusive environment

Do you need a breast/chest screen?

Breast cancer develops in 1 in 7 people that were assigned female at birth. People that were assigned male at birth have a lower risk, but their risk increases when they are on Hormone Replacement Therapy (HRT) for 5 years or more. Breast/chest screens can find cancers that are too small to feel. The sooner cancer is found, the more successful treatment is likely to be. A free, 10-minute breast/chest screen can detect cancer when it's still too small to feel, even by a doctor.

Are you aged 50 to 74 with no breast symptoms?

We recommend a breast/chest screen for:

- Cis women
- Trans women that have been on HRT for 5+ years
- Trans men that have not had top surgery
- Non-binary people that were assigned female at birth and have not had top surgery or assigned male at birth with 5+ years of HRT

Rainbow Sessions

All of our clinics strive to provide a safe and inclusive service and we run dedicated sessions throughout the year for LGBTQIA+ people who might need extra support, prefer to screen with other community members, or would like extra time to ask questions and talk to our radiographers. We call these Rainbow Sessions. More information about Rainbow Sessions can be found on breastscreen.org.au/rainbow.

Our program:

- Free
- Takes about 10 minutes
- Is with a woman radiographer
- Does not require a doctor's referral
- Is available across Victoria

How to book?

Call 1300 50 50 or visit breastscreen.org.au/rainbow to book. You can also send an email to communityengagement@breastscreen.org.au.

Rainbow Tick

Since March 2019, we have been **Rainbow Tick accredited**. This drives our ongoing improvement to build lasting LGBTQIA+ inclusion.
